INDEX TO VOLUME 15

Author Index

ASHFORD, J.L., *paper on* 'Quality and competition', 150

BEARDMORE, K., *paper on* 'Acceptance sampling using the hypergeometric distribution – a computer solution', 63

CAMERON, D.C., *paper on* 'Computer-based failure mode and effects analysis for quality management – a case study', 89
CHURCHILL, G.F., *paper on* 'Quality costing: a state-of-the-art study in the nuclear supplier industry', 67
COKER, A.O., *paper on* 'Computer-based failure mode and effects analysis for quality management – a case study', 89
COLEMAN, D.R., *paper on* 'An introduction to quality assurance in IBM Havant', 81
COULSON, S.H., *paper on* 'The role of statistical process control in polymer processing', 45
COURTIER, R.H., *paper on* 'Quantify – then qualify', 131
COUSANS, J.A., *paper on* 'The role of statistical process control in polymer processing', 45
CRADDOCK, P.A., *paper on* 'The interaction of quality assurance and quality control in welded fabrication', 112

DAGNINO, B.V., *paper on* 'Suggested improvements for the *ISO 9000* Standards', 95
DALE, B.G., *paper on* 'Quality costing: a state-of-the-art study in the nuclear supplier industry', 67

FLETCHER, K., *paper on* 'An international forum for research into quality assurance and quality management in construction: the work of the CIB W88 Commission', 139
FLOYD, L.W., *paper on* 'The Channel Tunnel: a focus on quality assurance', 134
FOX, M.J., *paper on* 'The great "economic quality" hoax', 72

GILL, B.W., *paper on* 'Control of site fusion jointing of MDPE pipelines', 146
GOH, A.B., *paper on* 'Material selection: a quality approach to this vital decision by Purchasing', 52
GOH, T.N., *paper on* 'Application of Taguchi's orthogonal array in a material screening experiment', 10
GROVER, C., *paper on* 'Quality management and the efficiency of construction firms', 165
GROVER, R., *paper on* 'Quality management and the efficiency of construction firms', 165

HIGGINS, S., *paper on* 'Computer-based failure mode and effects analysis for quality management – a case study', 89

ISAACS, A.T., *paper on* 'A clear vision of character verification systems', 86

JONES, J.S., *paper on* 'Probability plotting using Lotus 1-2-3', 98

KAYE, M.M., *paper on,* 'An introduction to quality assurance in IBM Havant', 81

LIM, T.E., *paper on* 'Optimisation of wave-soldering variables using factorial experiment', 14
LLOYD, N., *paper on* 'How Sony in Wales matched Japanese quality levels and won the 1988 British Quality Award', 20

MEAHAN, J., *paper on* 'Control of site fusion jointing of MDPE pipelines', 146
MELVILLE, S., *paper on* 'Quality improvements through people', 25
MURPHY, A., *paper on* 'Quality improvements through people', 25

OAKLEY-SMITH, J., *paper on* 'Managing quality in management contracting', 158

PANNELL, I., *paper on* 'The Single Market: implications for quality assurance in construction", 154
PATEL, B.M., *paper on* 'Manufacturing quality assurance – a systematic and logic approach to effective engineering management', 56
PATEMAN, J.D., *paper on* 'A company-wide quality awareness programme', 171
PILLING, B., *paper on* 'A total quality concept application in textile manufacturing', 29
PRESTON, G., *paper on* 'Organisational development as the base for total quality assurance', 5

ROY, S.K., *paper on* 'Application of Taguchi's orthogonal array in a material screening experiment', 10

SARGEANT, M.C.D., *paper on* 'An introduction to quality assurance in IBM Havant', 81
SHACKLETON, D.N., *paper on* 'The interaction of quality assurance and quality control in welded fabrication', 112
SINGER, A.J., *paper on* 'Quality costing: a state-of-the-art study in the nuclear supplier industry', 67
SMITH, J.A., *paper on* 'Computer-based failure mode and effects analysis for quality management – a case study', 89
SZMIDT, T., *discussion on* 'Application of Taguchi's orthogonal array in a material screening experiment', 121; *discussion on* 'Optimisation of wave-soldering variables using factorial experiment', 121

TAYLOR, G.A.R., *paper on* 'Fractional factorial experimental designs and orthogonal arrays', 117
THOMPSON, C., *paper on* 'Quality – the greatest asset any company can have', 17

Subject Index

Acceptance sampling using the hypergeometric distribution 63
Air filtration equipment. *See under* Failure mode and effects analysis
Automatic component insertion 26
Automobile industry 48, 90

Barriers to change 7
Boilers, quality costing of 69
Box-Whisker plots 167
British Quality Award 17, 19, 20, 25, 30
British Standard *882* 133
4778 56, 72, 73
4891 72
5750 25, 26, 49, 136, 145, 163, 171. *See also ISO 9000*
6001 57, 113
6143 72. *See also* Nuclear supplier industry
British Standards for textiles 33
British Standards Institution registration. *See under* Construction industry, QMS for
Building. *See under* Channel Tunnel
CIB W88
Construction industry

CEDAC. *See under* Problem solving
Certification
and testing, EEC 156, 157
for welded fabrication 113
of construction products 145
third party, for Channel Tunnel 136
Channel Tunnel, the
background to 134
design and construction of 134
grading of work for 136
quality requirements of 136
Character verification. *See under* Vision-based character verification systems
CIB W88 Commission, comparison of eight countries' building quality
construction 140
design 144
housebuilding 142
products 145
Cluster analysis 168
Colour television manufacture 20
Competitiveness
in textile manufacture 35
worldwide 48
Computer-based FMEA. *See under* Failure mode and effects analysis
Computer-based products, quality costing of 69
Computer package, Lotus 1-2-3. *See under* Probability plotting
Computer solution, for acceptance sampling, using the hypergeometric distribution 63
Construction industry, competitive tendering in
by contractors 150
by designers 150
design and build concept for 151
quality assurance solution to 151
Construction industry, cost-effectiveness of quality management in 165
Construction industry, implications of the 'Single Market' for 145, 154
Construction Products Directive 155
Public Procurement Directives 156
Construction industry, quality awareness programme in 171
Construction industry, quality management system (QMS) for 158
Construction industry, surveillance of
concrete cover 131
inadequate specification 133
piling 132
See also Site fusion jointing of MDPE pipelines
Consumer protection 33
Control and instrumentation systems, quality costing of 68
Control charts, use and misuse of 46
Cost of poor quality 28, 35, 52, 67, 95, 132
Cotton. *See under* Textile manufacture
Customer feedback 33, 35, 60, 83, 84, 144, 145

Danish building industry. *See under* CIB W88
Design of buildings 144, 150
Design of experiments, statistical 54
See also Fractional factorial experimental designs
Taguchi's orthogonal array
Wave-soldering variables
Digital telephone switching equipment. *See under* Telecommunications
Discriminant analysis 169

'Economic quality' concept, criticism of 72
Educational levels in QA department 85
Electronic systems, quality costing of 68
Engineering management, effective 56
Environment, quality of 36
Equipment, investment in 18, 33
European Economic Community legislation 133. *See also* Construction industry, implications of the 'Single Market' for
European Standards 154

Fabric. *See under* Textile manufacture
Failure mode and effects analysis (FMEA), computer-based 89
Fans, quality costing of 69
Fee System of building 158
Fishbone charts 22, 50, 90. *See also* Root cause analysis
Fisher's experimental designs 64, 117, 120
Fixed Rail Link. *See under* Channel Tunnel
Flow solder defects 27
Fractional factorial experimental designs and orthogonal arrays
detection of curvature 120
factorial experiments 117
Taguchi's designs 119
See also Design of experiments
French building industry. *See under* CIB W88
Fusion jointing. *See under* Site fusion jointing of MDPE pipelines

Glass manufacture 10
Graeco-Latin square 120

Housebuilding 142. *See also* Construction industry
Hungary, building industry in. *See under* CIB W88
Hypergeometric distribution. *See under* Computer solution

Information technology. *See under* Quality assurance in IBM, Havant
Inspection, reduction of. *See under* Welded fabrication
IQA examinations, paper A3 72
Interaction effects 118
ISO 9000 – 9004, suggested improvements for definitions/translations of terms 95, 96
human resources 96

non-conformances 96
quality costs 95
vendor audits 97
ISO 9004, and construction suppliers 151
Ishikawa's cause and effect diagram. *See under* Fishbone charts
Italian building industry. *See under* CIB W88

$L_{16}(2^{15})$ design 11
Lotus 1-2-3 91, 94. *See also* Probability plotting
Locomotives. *See under* Channel Tunnel
London Stock Exchange 167, 169

Machines with built-in SPC 51
Magnetic particle inspection 113
Material screening, use of orthogonal array for 10
Material selection, quality engineer's contribution to 52
Medium density polyethylene (MDPE) pipelines 146
Messages, for quality awareness 172
Microcomputer package, Lotus 1-2-3. *See under* Probability plotting
Motivation 7, 18, 21, 28, 61, 96
See also Quality awareness programme
Training

National Housebuilding Council (NHBC) 142, 167, 169
Norway, building industry in. *See under* CIB W88
Nuclear supplier industry, quality costing in 67

Offshore equipment, quality costing of 69
Organisational development, for total quality
and SPC 45
barriers to change 5, 7
in CTV manufacture 23
integration and work flow for 6
quality management for 56
training for 8
See also Precision engineering
Quality awareness programme
Telecommunications
Orthogonal arrays. *See under* Taguchi's orthogonal array

Packaging 84. *See also* Vision-based character verification systems
Piling
control of water in 132
geometrical accuracy of 132
Pipeline
installation. *See under* Site fusion jointing of MDPE pipelines
manufacture, quality costing of 69
Pixel counter 87
Polyester fibres 30, 32
Polymer processing. *See under* Statistical process control
Potential product defect analysis 90, 94
Precision controls, quality costing of 68
Precision engineering, quality improvement in
BQA Award for 17
investment in equipment for 18
training and motivation for 18
Pressure vessels, quality costing of 68. *See also* Welded fabrication
Printed circuit/wiring boards 14, 20, 26, 121
Probability plotting, using Lotus 1-2-3
advantages of 98
explanation of program for 99
examples and listings for 105
layout and spreadsheet principles 99
Problem solving
by CATs 26
by CEDAC 22
groups 7, 32, 36
techniques in engineering 58
See also Fishbone charts
Public Procurement Directives (EEC) 156

Quality assurance, definitions of 56, 82
Quality assurance in IBM, Havant 81
personnel 85
product development cycle 83
Quality audits of fusion jointing 147, 148
Quality awareness programme
in construction industry 158, 171
in textile manufacture 32
See also Motivation
Training
Quality circles 59
Quality costs 26, 112, 148
See also Construction industry, cost-effectiveness of quality management in
Cost of poor quality
'Economic quality'
Nuclear supplier industry
Quality department, role of 7, 57, 82, 84
See also Material selection
Welded fabrication
Quality improvement teams 26, 49
Quality management, reasons for adopting 165. *See also* Organisational development
Quality measurement equipment, checking of 60

Return of faulty fabric goods 35
Risk priority number 89
Root cause analysis 58
Rubber shells, testing of 52

'Single Market', the. *See under* Construction industry, implications of the 'Single Market' for
Site fusion joining of MDPE pipelines, control of
pilot study for 147
specifications for 146
Specifications, inadequate, for construction industry 133, 151
Spreadsheet programming, introduction to. *See under* Probability plotting
Star symbol plots 168
Statistical process control (SPC)
correct use of control charts for 46
definition of 45
future role of 51
role of, in polymer processing 49
use of, for problem solving 58
Sub-contractors to construction industry
QMS for 163
training of 173
See also Construction industry, competitive tendering in
Suppliers, quality assurance of 23, 26, 57, 97, 136, 151. *See also* Material selection
Swedish building industry. *See under* CIB W88

Taguchi's orthogonal array
application to material screening 10
criticism of 121
See also Fractional factorial experimental designs
Telecommunications industry
BS 5750 and TQM in 26
launch of programme 25
quality bonus 28
Tendering. *See under* Construction industry, competitive tendering in
Testing and certification
EEC 156, 157
in telecommunications industry 27
See also Certification
Textile manufacture, quality improvement in
achievements 33
consumer protection 33
new investment 33

process statistics 30
Three rules of quality control, Price's 47
Total quality. *See under* Organisational development
Traditional organisation structures 5
Training
for engineering quality 60
for FMEA 90
for total quality 8, 26, 163. *See also* Quality awareness programme
inadequate, in construction industry 133, 145
in fusion jointing 147
See also Motivation
Trains. *See under* Channel Tunnel

Unit management 21
United States of America, building industry in. *See under* CIB W88
Upstream action 21

Vendors. *See under* Suppliers
Vision-based character verification systems
grey scale 88
problems 86
recognition 87
resolution 87
search 87

Water control, in piling 132
Water industry. *See under* Site fusion jointing of MDPE pipelines
Wave-soldering variables, optimisation of
criticism of factorial experiment 121
planning of experiment 14
selection of parameters 15
verification and implementation 16
Welded fabrication, reduction of inspection in
cost benefits 112
MPI inspection 113
QA/QC model 113
quality assurance requirements 114

Zero defects 23, 97
